

Abinitio Online Training Course Content

Faculty: Real time and certified

1. Introduction to Abinitio
2. Abinitio Architecture
3. Graph Programming
4. Introduction to .dat and .dml files
5. Partition Components
 - Broad Cast
 - Partition by Expression
 - partition by range
 - partition by community
 - partition by percentage
 - partition by Round Robin
6. De-partition Components
 - Concatenate
 - Gather
 - Interleave
 - Merge
7. Multi file System(MFS)
8. Types of parallelism
9. Layouts
10. Sort Components
 - Sort
 - Sort with in groups
 - Sample
 - Partition by key and sort
9. Transform Components
 - Filter by expression
 - Aggregate
 - Scan
 - Rollup
 - De normalize Sorted

contact@smartmindonlinetraining.com

- Normalize
- g. Reformat
- h. Match sorted
- Dedup sorted

11. Working with Databases

12. Database components

- Run SQL
- Input Table
- Output Table
- Truncate Table
- Update table

13. Phase and check Points

14. Miscellaneous component

- Gather logs
- Run program
- Redefine format
- Trash
- Replicate

15. Dataset Components

- Input File
- Output File
- Lookup File
- Intermediate File

16. FTP Components

- FTP From
- FTP To

17. Compress Components

- Compress
- Uncompress
- Gzip
- Gunzip

18. Validate Component

- Check Order
- Generate Records

contact@smartmindonlinetraining.com

- Generate Random bytes
 - Compare Records
 - Compute Check Sum
 - f. Compare Check Sum
19. Translate components
- Record XML
 - Write XML
20. Project and Sandbox
21. Performance Tuning
